Dear Assessment Colleagues:

Welcome to the 2015 Conference of the Association for the Assessment of Learning in Higher Education and welcome back to Lexington, KY.

It was only two years ago that we held our last conference in Lexington with the continuing support of the University of Kentucky. So much has changed since then, both for higher education and AALHE. This year’s theme is *Actionable Assessment*. We know as assessment practitioners that this theme is always relevant and yet, in some ways, it is ever more a priority for our work in higher education. This reflects the maturity of institutions in collection and distribution of assessment data, which begs the question, how have we used the data. It also signifies the growing desire of institutional stakeholders and policymakers to identify more effective curricula and instruction.

We are fortunate to have keynote speakers whose work manifests this theme in different ways. Their backgrounds include important examples of connecting data to action through strategic leadership, research, partnerships, curriculum development, and teaching. Equally important, I look forward to the examples, brought forward by our individual presenters on this theme. This year, AALHE had its most robust response to the call for proposals since it began its annual conference with 115 submissions. The presentations demonstrate the tremendous range and insight into assessment practice of our membership.

As the activity of our conference is growing, so is the work of our membership. Additional members have joined the different service committees since last year. As a result, we’ve been able to handle the increased submissions to the conference, offer new services to membership (e.g. Twitter chats), and find ways to advance the reputation of the association. I invite everyone to attend the business meeting on Tuesday morning to find out more about the work of these important groups and learn about opportunities for involvement.

As I complete my term as president, I would like to thank the association for this opportunity and welcome Tara Rose as the AALHE’s new president. From the beginning of the AALHE’s founding, Tara has been a consistent source of behind-the-scenes leadership. She has been instrumental in not only the success of our annual conferences but also guiding the development of the support structures for a growing association. I welcome Tara’s more public role as president and am pleased to hand off the torch to her.

Thank you and enjoy the conference!

*Eric Riedel, Ph.D.*
President, Board of Directors
Association for Assessment of Learning in Higher Education

GENERAL INFORMATION

Meeting Locations
All AALHE 2015 Annual Conference sessions will be held at the Hilton Lexington/Downtown Hotel in Lexington, Kentucky. All times are in Eastern Standard Time.

Registration Hours
The schedule for onsite registration is:
- **Sunday, May 31**: 12:00 PM—3:00 PM
- **Monday, June 1**: 9:00 AM—5:00 PM
- **Tuesday, June 2**: 7:00 AM—5:00 PM
- **Wednesday, June 3**: 7:00 AM—11:45 AM

Sponsor Exhibit Hours
Please stop by the sponsor tables during the following hours.
- **Monday, June 1**: 11:00 AM—12:00 PM, 2:30 PM—3:00 PM
- **Tuesday, June 2**: 11:30 AM—1:00 PM, 2:45 PM—3:45 PM
- **Wednesday, June 3**: 8:00 AM—9:30 AM

Reception—Magnolia Room
Monday, June 1: 5:30 PM—7:30 PM

Breakfast and Lunch Breaks
- **Monday, June 1**: Snack 2:30 PM—3:00 PM
- **Tuesday, June 2**: Breakfast 7:00 AM—8:00 AM, Lunch 12:00 AM—1:00 PM, Snack 2:45 PM—3:45 PM
- **Wednesday, June 3**: Breakfast 7:00 AM—8:00 AM

Internet Access
Complimentary wireless internet is available in all meeting and hotel rooms.

Lost and Found
Lost and found items can be taken to or claimed at the Conference Registration Desk.

Cell Phones and Smart Phones
As a courtesy to speakers and attendees, please turn off or silence your phone when attending sessions.

Smoking/Non-Smoking
Smoking is prohibited in all convention areas.

Time Zones
Lexington, Kentucky is located in the Eastern Standard Time Zone. If you traveled from a time zone other than this, please set your watches and clocks to Eastern Standard Time Zone so as not to miss any AALHE 2015 Conference events.

Attire
The attire for all events is business casual. Meeting room temperatures and personal comfort vary. Please plan accordingly.

Mr. Raymond M. Burse, President, Kentucky State University

A native of Hopkinsville, Ky., Raymond M. Burse has a long record of achievement in academics, athletics and community service. As president of KSU from 1982 to 1989, he oversaw record enrollment, more than $60 million in capital improvements and significant enhancements in the academic and financial operations of the institution, including the establishment of the Whitney M. Young College of Leadership Studies. Burse received his law degree in 1978 from Harvard Law School. He received a bachelor’s degree in chemistry and mathematics in 1973 from Centre College, where he was named to the dean’s list for four years.

Continuing his involvement in higher education and active in the community, Burse was a member on the boards of Centre College and Alabama A&M University. His other commitments have included serving on the boards of the Louisville branch of the St. Louis Federal Reserve Bank, the Frankfort/Franklin County Chamber of Commerce and the State YMCA of Kentucky. He served as chair of the Louisville Free Public Library Advisory Commission, chair of the Appeals Committee of the Southern Association of Colleges and Schools Commission on Colleges and vice chair of the Louisville Community Foundation Board of Directors.

Opening remarks by:

Dr. Tim Tracy, Provost, University of Kentucky

Timothy S. Tracy became Provost at the University of Kentucky on February 23, 2015. He received his bachelor’s degree in pharmacy from Ohio Northern University, his PhD in clinical pharmacy from Purdue University, and completed a postdoctoral fellowship in clinical pharmacology at Indiana University. Prior to entering academia, he practiced in community and hospital settings throughout Ohio. Tracy launched his academic career at West Virginia University, where he rose through the ranks to Full Professor. During his time at West Virginia University, he won six college-wide teaching awards and one university-wide teaching award. Tracy then joined that University of Minnesota where he served as Head of the Department of Experimental and Clinical Pharmacology, Director of the Center for Forecasting Drug Response and Director of Clinical and Translational Research Services. In August 2010, he joined the University of Kentucky as Dean of the College of Pharmacy and from May of 2012 until August of 2013, also as the Interim Provost.
Tuesday, June 2, 2015; 12:00—2:00 PM (Keynote)
Hilton Lexington/Downtown: Grand Kentucky Ballroom A

**Making Assessment Matter to Student Learning and Success**

**Dr. Jillian Kinzie, Associate Director, Center for Postsecondary Research and the National Survey of Student Engagement (NSSE)**

Jillian Kinzie conducts research and leads project activities on effective use of student engagement data to improve educational quality, and studies evidence-based improvement in higher education. She managed the Documenting Effective Education Practices (DEEP) project and Building Engagement and Attainment of Minority Students (BEAMS), and also serves as senior scholar on the National Institute for Learning Outcomes Assessment (NILOA) project, an initiative to study assessment in higher education and assist institutions and others in discovering and adopting promising practices in the assessment of college student learning outcomes. Dr. Kinzie has co-authored numerous publications including *Using Evidence of Student Learning to Improve Higher Education* (Jossey-Bass, 2015); *Student Success in College: Creating Conditions that Matter* (Jossey-Bass, 2005/2010); *Continuity and Change in College Choice: National Policy, Institutional Practices and Student Decision Making*, and the second edition of *One Size Does Not Fit All: Traditional and Innovative Models of Student Affairs Practice* (Routledge, 2008/2014).

Wednesday, June 3, 2015; 9:50—11:00 AM (Plenary)
Hilton Lexington/Downtown: Grand Kentucky Ballroom A

**Forward-Looking Assessment: Using Findings to Innovate, Create and Design**

**Dr. Robert Pacheco, Vice President of Institutional Effectiveness, MiraCosta College**

Dr. Pacheco leads integrated and strategic planning efforts at the institution and acts as MiraCosta College’s accreditation liaison officer. In addition, Bob is a Board Member of the Association for the Assessment of Learning in Higher Education (AALHE) and serves on the advisory board to the National Community College Benchmarking Project (NCCBP). As Assessment Chair of the RP Group, Bob conducts workshops on assessment methods and analysis, moderates a national learning outcomes assessment listserv and serves as a contributing author on assessment in the monthly journal, *Perspectives*. Bob has presented sessions on assessment and accreditation topics with the staff of the WASC Senior Commission for Colleges and Universities and the Accrediting Commission for Community and Junior Colleges. Dr. Pacheco has mentored over 40 institutions in their development and implementation of institutional-wide assessment practices and the use of evidenced-based decision making.
ABOUT AALHE

The Association for the Assessment of Learning in Higher Education (AALHE) is an organization of practitioners interested in using effective assessment practice to document and improve student learning. As such, it aims to serve the needs of those in higher education for whom assessment is a tool to help them understand learning and develop processes for improving it.

AALHE began to take shape in late 2009. Formed in part because no other organization had emerged to replace the range of resources and opportunities for interaction that the Assessment Forum of the American Association for Higher Education had offered until it closed in 2005, AALHE’s Founding Board of Directors launched this organization with the intention of providing much richer resources and a wider range of interactive opportunities than the Assessment Forum did, largely because much of its content and conversations will be online.

The organization and its website have been designed to constitute a wide range of resources for all who are interested in the improvement of learning, from assessment directors who organize and manage programs, to faculty and Student Affairs professionals who use assessment strategies to understand their students’ learning, to graduate students and others who are conducting research on the effectiveness of assessment processes and instruments, to institutional researchers who want to develop effective learning data systems. Through its largely virtual design, AALHE proposes to stimulate discussions both within the groups described above and within the larger community of assessment practitioners. From special-interest blogs to theme-based communities of practice, to a resource room filled by its membership to help their member colleagues, AALHE intends to offer assessment practitioners a variety of ways to learn and share their thoughts about assessing and improving learning.

AALHE is housed at the University of Kentucky, which provides generous technical and staff support, but the organization remains an independently incorporated, member-funded, non-profit entity recognized by the State of Kentucky.

ON THE COVER

Velvet Aberrations, Ceramic Sculpture
Hunter Stamps, Associate Professors of Ceramics, University of Kentucky

Hunter Stamps is Professor of Ceramics at the University of Kentucky in Lexington. Hunter also taught at the University of Central Arkansas, the University of Arkansas-Little Rock and at the University of Alaska-Fairbanks. Hunter received his M.F.A. from Indiana University in Bloomington and his B.F.A. from the University of North Carolina in Asheville.

The mixed media sculptures he creates incorporate ceramics, fabricated metal, molds, encaustics, rubbers, and resins. The psychologically charged forms communicate an abject and fragmented aspect of the human condition. Hunter’s work has been exhibited in over one hundred exhibitions; including galleries across the United States as well as China, Germany, Austria, Croatia, and Spain. Images of his work have been published in publications such as Ceramics Monthly and other scholarly journals, newspapers and exhibition catalogues.

Analytics to Manage and Run Higher Education Institutions
Ballrooms A, B, & C

Institutions of Higher Education are faced with increasing challenges in areas such as decreasing enrollments and government spending cuts which drive the need for increased productivity and scrutiny over every dollar spent. Tighter accreditation regulations and outcome-driven accountability force transparency in student progress tracking. Heightened affordability concerns and growing public doubt about college value make that transparency a must. Much data is collected internally and is readily available externally that with Analytics can and will provide the strategic management tools for success. Analytics work and push the needle from standard reporting where we answer “What Happened?” to strategic management where we answer “How to Achieve the Best Student and Institutional Outcomes with the Effects of Variability.

Mr. Raymond Burse, President, Kentucky State University

2:00 — 2:30 PM

Cheyney University’s Experience of Ten Year Re-Affirmation of Accreditation Self-Study Process

Triple Crown
Accreditation is considered the lifeblood of every University/College. Despite this, most institutions due to the lack of clarity on the re-affirmation process end up on monitoring status. This presentation will discuss the Cheyney University’s 10 year reaffirmation of accreditation with Middle States Commission on Higher Education. The discussion will include preparations prior to the self-study design, expectations after approval of self-study design, getting campus community ready for the process/visit, budgeting/logistical issues, preparations needed before and after the team visit.

Phyllis Dawkins, Cheyney University of Pennsylvania
Sesime Adanu, Cheyney University of Pennsylvania
Shayla Moore Prince, Cheyney University of Pennsylvania

Strand 2, Intermediate

Detecting, Measuring, and Acting on "Susceptibility to Intervention"

Blackberry Lilly

This session will share results of two separate assessment efforts associated with an extra-curricular leadership and alcohol education intervention at the University of Wisconsin – Madison. While evaluating former assessment results we detected that Greek students may be more susceptible to leadership and alcohol intervention than other students representing non-Greek student organizations. Spring 2015 involved implementing a revised assessment instrument which provides further evidence related to the susceptibility, or non-susceptibility, of representative student groups on-campus. Groups also included in Spring 2015 analysis included student organization members, Greek students, sophomore varsity athletes, and students at-large.

Adam Ross Nelson, University of Wisconsin Madison

Strand 5, Intermediate
A Treasure Trove of Data Hiding in My University
Crimson Clover
When I arrived at Wright State University in Ohio, I was charged with building an assessment program for student learning. It seemed the university did not do assessment. As I talked to different people, I found they were doing a great deal of student learning assessment, they just didn't know it. In this session, we will talk about places to look for data to support university level assessment of student learning outcomes and how to create a comprehensive way to collect data from many different places.

_Renee Aitken, Wright State University_

_**Strand 4, Beginner**_

Cultivating a Culture of Evidence at Your Institution
Bluegrass Room I
Marian University College of Osteopathic Medicine uses a stakeholder inclusiveness model for building a culture of evidence in a competency-based and/or outcomes-focused curriculum. This session will introduce techniques and strategies to develop this culture. Facilitators will share milestones and barriers encountered through formulating approaches to cultivate an assessment culture emphasizing stakeholder inclusiveness. Implementation of a “Catch and Release” method for data mining will be the framework used for promoting an evidenced-based environment focused on curricular quality improvement and student success.

_Sherry Jimenez, Marian University College of Osteopathic Medicine_
_Sarah Zahl, Marian University College of Osteopathic Medicine_

_**Strand 4, Beginner**_

A Model for Assessing Impacts of Community Engaged Learning
Bluegrass Room II
How do you assess community engagement and its impact on the community? As institutions we have examined the outputs and activities of our students, faculty and staff. But what impact have these outputs and activities had on addressing recurring community problems and needs? And how do we know we are making a difference? We ask session participants to be prepared to share examples of assessments of the impact of university-community engagement efforts.

_Karen Mumford, UW-Eau Claire_
_Jennifer Fager, UW-Eau Claire_
_Cheryl Contant, Advancing Your Strengths_

_**Strand 3, Intermediate**_
Meaningful Program Review: A New Approach

Ballroom D

Although most institutions engage in program review, the process often reflects compliance rather than a genuine effort to improve quality. Resulting reviews are set aside and forgotten. To address this, the presenter shares a program review model that involves comparative data and institution-wide peer feedback. Attendees will examine the model, including the criteria and associated data, understand the process associated with it, review implementation steps, and discuss how it can be applied in other contexts to make program review meaningful.

Maureen Andrade, Utah Valley University

Strand 7, Intermediate

Snacks & Discussions

Join us for snacks and conversations in the Pre-function area outside of the Ballrooms.

Using Academic and Co-Curricular Program Assessment to Assess Institutional Learning Outcomes

Triple Crown

DePaul University’s strategic planning process called on DePaul to “focus the entire university community on student learning and success.” In response, we realized that DePaul’s successful program-level assessment process did not provide data on what our students overall know or can do. In this interactive session, we will describe a method to assess institution-level learning outcomes that honors programs’ on-going assessment efforts, including key challenges and how we used our institutional strengths to facilitate this process.

Caryn Chaden, DePaul University
Jen Sweet, DePaul University

Strand 1, Intermediate
How to Help Faculty Make Rubrics More Effective Rubrics
Blackberry Lily
Five-point scales and Sequences Which Expand Little by Little (SWELL rubrics) don’t work. They don’t discriminate levels of student experience, scaffold student learning, pinpoint areas for curricular improvement, or measure institutional effectiveness. This session will present principles for making rubrics that do work and discuss participant’s ideas for using them.

David Dirlam, Virginia Wesleyan College

Strand 1, Intermediate

Tools, Methods, and People: Doing Campus-Wide Assessment Well
Crimson Clover
This session will offer lessons learned at LaGrange College (a small liberal arts college in west central Georgia) from the reaffirmation process, lessons that led to better tools, better structures, and better processes – especially designed to improve institutional effectiveness. Participants will learn about the use of an assessment handbook, a functional template for annual reports, and a process for moving information from the unit level, through widely-based review, to the level of strategic resource allocation.

David Garrison, LaGrange College
Carol Yin, LaGrange College

Strand 1, Intermediate

A Convergence of Data: Connecting the Dots of Assessment Results across Campus
Bluegrass Room I
This session will focus on how a large, comprehensive, public, research university fosters an integrative approach to promote an assessment of undergraduate student learning process that incorporates multiple data sources, including both local and national data to foster discussions that lead to program improvements; yet remains flexible enough for programs/colleges to customize to their specific needs.

Steven Hawks, University of Minnesota-Twin Cities
Ronald Huesman, Jr., University of Minnesota-Twin Cities

Strand 6, Intermediate
Improving Student Learning: A Kentucky Perspective on a Multistate Effort (Panel Session)
Bluegrass Room II
The Multi-State Collaborative to Advance Learning Outcomes Assessment (MSC) is an initiative designed to provide meaningful evidence about how well students are achieving important learning outcomes. The initiative foregrounds a distinctly different form of assessment than the traditional standardized test. Instead of producing reports about average scores on tests, the project is piloting the use of common rubrics applied by teams of faculty to students’ authentic college work. In this session, participants will learn more about this project from those who have been engaged in the pilot phase and how your institution and state could implement the MSC.

Melissa Bell, Kentucky Council on Postsecondary Education
Tara Rose, University of Kentucky
Karman Wheeler, Bluegrass Community and Technical College
Moderator: Jill Compton, Kentucky Council on Postsecondary Education

How Do We Share What We Know? Communicating Assessment Results (Panel Session)
Ballroom A
Universities have a lot of assessment data – often piles and files of it! How can we share our data in ways that are meaningful and workable? Identifying the audience(s) for different types and levels of detail is an important part, but there is more. Join with other assessment experts and see examples of how some universities and programs share data and help to brainstorm other methods for getting out information in ways that work.

Catherine Wehlburg, Texas Christian University
Shawntel Landry, American College of Education
Monica Stitt-Berg, University of Hawai’i at Mānoa
Moderator: Lisa Mehlig, Rock Valley College

Using Technology to Engage Faculty in Meaningful Assessment
Ballroom B
The logistics of conducting large scale meaningful assessment activities can be daunting and frustrating. In this session the presenter describes how technology can be used to engage faculty in assessment projects while minimizing the chaos of coordinating common readings and data collection. The specific technology described is based on the assessment tool in Canvas, a learning management system, that can connect institutional or departmental learning outcomes to specific assignments in any class. Data can be collected seamlessly and analyzed in a number of different ways.

Susan Wood, Dona Ana Community College

Monday, June 1, 2015

3:00 — 4:00 PM (continued)
General Education Assessment: Our Evolution to an Assessment Culture
Ballroom C

This session will follow our college’s evolution to improved General Education assessment and a culture of effective assessment. The progression of our institution’s transition through the revision of our data flow, allotment of time for reflective analysis of data and planning, development of college-wide rubrics and involvement of General Education faculty (full & part-time) will be discussed. Methods for reporting further actions based on results will be shared.

Sharon Wilson, Maysville Community & Technical College
Pam Stafford, Maysville Community & Technical College
Dana Calland, Maysville Community & Technical College

Strand 1, Intermediate

A Simple Model for Learning Improvement: Weigh Pig, Feed Pig, Weigh Pig
Ballroom D

Assessment literature varies wildly regarding the definition of "learning improvement." We attempt to clarify the concept to participants by providing a simple model of evidencing learning improvement - assess, intervene, re-asses - and describe how the model can be successfully applied. We will close with a discussion about how higher education can transition from an emphasis on assessment to an emphasis on learning improvement. This presentation is based on the authors’ recent NILOA Occasional Paper that bears the same title.

Keston Fulcher, James Madison University
Megan Good, James Madison University
Kristen Smith, James Madison University

#AALHE2015 Lexington, Kentucky 15
Doing Assessment of Student Learning at Scale: An Overwhelming Task?

**Triple Crown**

Imagine having to assess the learning of over 250,000 students. Scary, isn’t it! In its LMS, University of Phoenix has implemented a course-embedded assessment model using signature assignments and criterion-referenced scoring rubrics to gather SLO data at the institution, college, program, and course levels. Employing an electronic assessment management tool, data are disaggregated for each of these by location, modality, student demographics, degree level, etc.; hence, reporting is robust. If UOPX can do it, so can you! Find out how.

*Joanne Weiss, University of Phoenix*

**Strand 1, Intermediate**

A Researcher-Practitioner Partnership to Assess Learning in Developmental Education

**Blackberry Lilly**

This session will describe a mixed-method study of student learning in developmental English, reading and mathematics. This project, a partnership between community college practitioners and university researchers, represents a unique attempt to measure learning for the purpose of refining instruction. The session will describe the assessments (including student interviews), research findings, and examples of how results will be used to inform curricular and pedagogical refinements.

*Madeline Trimble, Community College Research Center*
*Hoori Kalamkari, Community College Research Center*

**Strand 1, Intermediate**

A Proposed Model for Successful Assessment Leadership

**Crimson Clover**

What is the best approach to developing and sustaining an assessment system that leads to continuous improvement? What do assessment leaders need to know and what skills should they possess to successfully foster assessment to meet today’s challenges in higher education? While there are no easy answers to these reasonable questions, we will offer some insights into what it takes to be successful assessment leaders and how these insights may be applied to other institutions of higher learning.

*Jennifer Fager, UW-Eau Claire*
*Roberta Teahen, Ferris State University*
*Diane Nyhammer, Blackhawk Technical College*

**Strand 4, Intermediate**
Action Plans and Beyond: The Importance of Designing for Evidence of Improvement
Lilly of the Valley
This presentation will present an improvement model in which data is used not only to inform action plan development, but also to evaluate the action plan’s effectiveness. Best practices in action plan development will be discussed, along with real-life examples from both academic and co-curricular entities. In recent years, simply taking action based off assessment findings is not enough, and this presentation will give ideas for closing the loop on the assessment cycle while demonstrating improvement.

Skip Kastroll, Liberty University
Tim Fowler, Liberty University

Strand 1, Intermediate

Assessment and Accreditation: An Institutional Collaborative Model
Bluegrass Room I
This session will include a presentation of Capella University’s collaboration between assessment and accreditation professionals. The presentation will begin with an introduction to Capella University’s structure, educational and assessment philosophy. Following the introduction is an overview of the accreditation cycle and a discussion of how assessment and accreditation staff partner with one another to ensure successful outcomes and continuous improvement.

Stacy Sculthorp, Capella University
Heather Schroeder, Capella University
Jeremie Bellenir, Capella University

Strand 2, Beginner

Outcomes Assessment of a Study-Abroad Program
Bluegrass Room II
This study is designed to investigate into the relationship of students’ study-abroad experiences with their retention, their perceptions of the overall college experience, job placement, and their global awareness. A group of students with study-abroad experiences were selected as the sample, and another group of students without such experiences were identified as the comparison group. The data for this study were from the Graduating Student Survey, the Global Perspectives module, and student enrollment database.

Yuxiang Liu, St. John’s University
Donghui Zhang, Lianing University

Strand 5, Intermediate
Organizing (Actionable) Home-Grown Assessments for Key Institutional Outcomes
Ballroom A
Locally-developed assessments are attractive for a number of reasons: they align closely to local outcomes and values, they require no purchase or fee, and, most important, they increase actionability by building faculty ownership of both the learning outcome and the data generated. Those attending this session will consider criteria for “good” locally-developed assessments, gain ideas for meaningful assessment projects aimed at key questions or outcomes, and identify strategies for engaging faculty in a method-development process on their own campus.

Joan Hawthorne, University of North Dakota
Strand 4, Intermediate

Validating Learning Across Institutions and Modalities: Implications for Learning Assessment Practitioners
Ballroom B
This presentation compares and contrasts the methods of verifying learning across different modalities and institutions. These include courses, prior learning assessment (exam and portfolio-based), competency-based education (especially credit equivalency methodology), traditional transfer-of-credit, and learning outcomes assessment. Assumptions of each regarding specificity, complexity, measurement, and transferability of learning are examined. One implication is that an expanded and challenging future role for learning outcomes assessment practitioners is needed for institutions to facilitate effective use of diverse learning environments.

Sheryl Kristensen, Walden University
Strand 3, Intermediate
Equity for Our Students: Serving Several Masters but Remaining True to Liberal Arts
Ballroom D

University of West Florida (UWF) and LIU-Post faculty and administrators use assessment to advance liberal arts education. While both institutions address regional accrediting agencies’ requirements, as a state institution, UWF must also meet Florida state mandates, which create more specific demands than those LIU Post faces as a private institution. The two institutions will discuss how they approach assessment and student learning, which varies across institutions in some aspects but converges in others. The approaches used by these institutions should be applicable to other institutions.

Margaret Boorstein, Long Island University-Post
Claudia Stanny, University of West Florida
Lori Knapp, Long Island University

Strand 4, Intermediate

5:30—7:30 PM

RECEPTION

Please join us for a complimentary reception for all conference attendees located downstairs in the Magnolia Room. Drinks and hors d’oeuvres will be served.

2016 AALHE Conference
Milwaukee, Wisconsin
June 6-8, 2016
at the Pfister Hotel

#AALHE2015
Tuesday, June 2, 2015

7:00—8:00 AM

BUSINESS MEETING/BREAKFAST
Please join us for a complimentary buffet breakfast in the Pre-function area and to participate in the annual business meeting. The meeting will be held in Ballroom A.

8:00—8:30 AM

BUSINESS CARD EXCHANGE
Please join attendees in the sponsor hall area for networking. The session will begin immediately following the business meeting.

MEMBERS SERVICES COMMITTEE MEETING
Participants in the Members Services Committee are asked to attend a special meeting in the Saddlebred Board Room.

8:30—10:30 AM

Unlocking the Black Box of Assessment
Triple Crown
Institutions provide co-curricular programs to support student learning and development. Although practitioners know what these programs should entail, often there is a “black box” surrounding what actually occurs during program implementation. Fortunately, Implementation Fidelity data can unlock the “black box,” helping practitioners make appropriate inferences based on assessment data. This workshop will describe Implementation Fidelity using a collegiate alcohol intervention program. Participants will practice collecting Implementation Fidelity data, while learning how Implementation Fidelity can be used to improve student outcomes.

Kristen Smith, James Madison University
Tia Mann, James Madison University

Strand 5, Intermediate

Test Question Editing Workshop – Improve Your Test Item Writing Skills through Editing
Blackberry Lilly
This workshop will be 75% hands-on editing of test questions. After an overview of learning objectives for the session and instruction on identifying common errors, participants will be provided a list of test questions containing errors frequently found in exams. They will be asked to edit the questions to improve the overall quality of the test items. Edited questions will be shared with all attendees. Through this process, participants will hone their skills at both writing and editing items.

Jane Souza, St. John Fischer College
Jennifer Matthews, St. John Fischer College

Critical Conversations: Key to Moving from Assessment ‘Busy Work’ to Meaningful Results

Crimson Clover

Faculty involved in the assessment process often ask “What do you need me to do?” rather than “What do I need to know?” to assess and improve student learning. These two different approaches can lead to different results: the first can be considered “busy work”, while the second can lead to actions with meaningful results. Planned, inclusive conversations can help make this attitude shift a reality. This session will walk you through a process for planning such critical conversations.

Fiona Chrystall, Asheville-Buncombe Technical Community College

Strand 4, Beginner

UNM's First Year Student Programs: Turning Assessment into Programmatic Progress

Lilly of the Valley

The assessment process for UNM’s first year students began as a way to meet the requirements of the assessment climate on campus. The model now serves as an institutional assessment template. From stakeholders and campus partners to the specific student populations served, UNM Academic Communities learned how to include, impact, and tell the story to all benefactors in a comprehensive assessment process. This collaborative assessment practice informs advisors, students, parents, deans and chairs of departments about the first year learning program as well as the factors that strengthen retention and success rates. Come to this session to learn about an innovative assessment cycle (utilizing AAC&U rubrics, TK20, UNM’s Office of Institutional Analytics, and Enrollment Management data. You will brainstorm independently, collaborate with others and modernize your program’s assessment plan. We will strategize ways to obtain data, define relevant facts, and identify efficient ways to share program outcomes with your educational communities.

Julie Sanchez, University of New Mexico

Improving Inter-Rater Reliability Amongst Faculty in Program Learning Objective Evaluations

Bluegrass Room I

Assessment of program learning objectives is a key part of the university assessment process, especially in answering to accrediting bodies. We have developed a way to get faculty to assess a specific assignment in each course which evaluates a given program learning objectives. One of the difficulties has been managing inter-rater reliability. This workshop will provide tools for assessment leaders to train their faculty in both meaningfully participating in program learning assessment while educating them on inter-rater reliability.

Julie Woltl, Hope International University

Strand 1, Intermediate
The Syllabus Show: Clever DIY Tips to Get Your Institution Together!
Bluegrass Room II

Does your institution need a faculty syllabus upgrade? This session focuses on a) creating an institutional plan to upgrade syllabi for use as evidence in the accreditation process and b) assisting individual faculty in reviewing the quality of their syllabi. Participants are encouraged to bring a copy of one of their syllabi for use in this session.

Alana Malik, University of Toledo
Angela Paprocki, University of Toledo
Christopher Roseman, University of Toledo
Constance Shriner, University of Toledo

Strand 2, Beginner

Assignments as Assessment: Catalyzing Assignment Design on Campus
Ballroom A

This workshop will outline an assignment charrette model, which may be used by campuses to engage with assignment design conversations as well as alert participants to resources available for modification in designing assignment workshops. Elements considered will include good assignment design, alignment, exploration of the assignment library, and other relevant resources.

Natasha Jankowski, National Institute for Learning Outcomes Assessment
Pat Hutchings, National Institute for Learning Outcomes Assessment

Strand 1, Intermediate

Data Envelopment Analysis for Assessment and Institutional Effectiveness Practitioners
Ballroom B

The session introduces Data Envelopment Analysis (DEA), a non-parametric productivity analysis tool to assessment and institutional effectiveness practitioners. DEA measures the relative performance of organizational decision making units (DMU) where the presence of multiple inputs and outputs makes comparison difficult. Using academic program review data, the hands-on session demonstrates a step by step approach of how DEA can be used for determining relative performance of academic program and how IE practitioners may utilize the information for decision making.

Taiwo Ande, University of Mary Washington
Christopher Garcia, University of Mary Washington

Strand 6, Advanced
A Generative Approach to Analyzing Mission Statements for Actionable Institution Assessment
Ballroom C

Mission Statements are best understood, not as prescriptive, but as generative. Aspirations embedded within these statements must be operationalized in a manner consistent with the culture of the institution. This requires designing institutional and general education goals and outcomes that are generated by the mission statement. Such goals and outcomes are necessarily aligned with the mission and will facilitate meaningful and actionable assessment. Participants in this session will analyze mission statements, examine goals, outcomes, and gain an understanding of the reciprocal connections between student work products, institutional goals, and the mission statement.

Catherine Wehlburg, Texas Christian University

Strand 1, Intermediate

Rubrics and Norming: A Process for Evidence-Based Discussions about Student Learning
Ballroom D

This interactive and hands-on workshop will model the process of rubric usage: from conceptualization and development to implementation and then to analysis and the reporting of results. We will discuss fundamental assumptions about rubrics and their uses, and we will create and develop a rubric around a well-known artifact (chocolate), norm as raters, assess these artifacts, analyze the results, and discuss ways of interpreting and reporting on these results. Participants should leave this workshop equipped to lead this process on their own campuses in both academic and extra-curricular settings.

Graduate Programs: Shifting the Mindset from Individual-Student to Program-Level Assessment
Triple Crown

Graduate programs need to carry out program-level learning outcomes assessment. Because their context differs from undergraduate programs, they cannot always mirror undergraduate assessment practices. In this session, I describe differences between graduate and undergraduate program learning assessment, including faculty perceptions, and specific challenges faced by graduate programs. I offer examples of graduate program assessment at a research university. Attendees will have opportunities to critically review approaches and participate in a discussion on effective graduate program assessment strategies.

Monica Stitt-Bergh, University of Hawai‘i at Mānoa

Strand 1, Intermediate
Guarding against Assessment Retrenchment: An Institution’s Plan and Progress
Blackberry Lilly

In many institutions, assessment activities degrade after accreditation teams or the “dynamic assessment-advocate” leaves. This session will present one University’s efforts to engrain assessment firmly into the institution’s culture by moving past the impetus for initiating these strategies, accreditation. The University’s recent assessment evolution, including the structure, strategies, and processes implemented will be discussed, shared with, and reviewed by attendees.

Terri Flateby, Georgia Southern University

Strand 4, Beginner

Program Review: Beyond Compliance to Program Improvement
Crimson Clover

Learn how one institution took the program review binder off of the shelf and created an efficient new data driven process. Explore how faculty outlooks shifted from assuming data would result in negative implications to a process including self-examination and reflection of program health ultimately resulting in continuous improvement.

Kathleen Gorski, National Louis University

Strand 7, Beginner

HEighten ™ Outcomes Assessment Suite: New Considerations in Assessing General Education Student Learning Outcomes (Sponsored Session)
Bluegrass Room I

Institutions are continuing to seek MORE student learning outcome data and most are anticipating the need for data to skyrocket in the next 5 years. Yet, almost as quickly as the demand for data grows, institutional staffing resources are being minimized. Assessment resources that provide evidence of student learning in flexible ways to meet the evolving needs of institutions are highly coveted. Collecting the right evidence that provides a reasonable basis for refining learning goals or making curricular changes is a necessity. In this presentation, we will discuss how Heighten was developed to meet the needs of institutions who seek evidence of student learning in the areas of Written Communication, Critical Thinking and Quantitative Literacy.

Javarro Russell, ETS

Feed 'em, Pay'em, then Trust Them to Carry On: Converting to Faculty-Driven Assessment
Lilly of the Valley

Bring your problems and share your stories about lack of “faculty buy-in” or the need for "faculty-driven" assessment. Then think about what those very terms imply about the process. We will present a success story of faculty involvement from the views of an administrator and a tenured faculty member. Next, we will discuss possible solutions to related issues raised by participants.

Josie Welsh, Arkansas University
Bob Bennett, Arkansas State University

Strand 1, Beginner
Assessing Your Assessment Plan
Bluegrass Room II
While most programs have assessment plans, not all plans yield information that is genuinely useful for improving student learning. This presentation will present the critical questions participants should ask about their assessment plan, from the learning outcomes themselves to the implementation and interpretation of their data. Reflecting on their own plans, participants will leave with an agenda for prompting discussion back on their campuses.

Susan Hatfield, Winona State University

Overcoming Challenges in Implementing Graduate Program Assessment (Panel Session)
Ballroom D
Assessment of graduate programs presents a unique set of challenges, such as overreliance on capstone assessment and meeting the requirements of disciplinary accrediting bodies. Each of our panelists will present an example from their institution on how they have addressed a particular challenge in graduate program assessment. We will then engage participants in a discussion on challenges and best practices in graduate program assessment in accredited and non-accredited disciplines, and identify areas for further research and work.

Sharon Walters, Southern Illinois University
Nan Yancey, Lewis University
Jion Liou, Lewis University
Tracy Bartholomew, Concordia University Chicago
Jen Sweet, DePaul University
Moderator: George Smeaton, Landmark College

LUNCH/KEYNOTE
12:00—2:00 PM
Making Assessment Matter to Student Learning and Success
Ballrooms A, B, & C
Understanding what students know and are able to do as a result of their college education is fundamental to student success and to the quality and effectiveness of American higher education. Yet many in the academy still view the assessment of student learning as an obligatory, externally imposed chore. This session focuses on what colleges and universities can do to move the assessment of student learning from an act of compliance to the effective use of assessment results to guide changes that foster stronger student and institutional performance. This session draws on the work of the National Institute for Learning Outcomes Assessment to highlight productive ways to think about and implement assessment work. Central to realizing its promise, assessment is best conceived as an institutional strategy, a core function of continuous improvement, and a means for faculty and staff to support effective institutional performance and enhancements in student learning and success.

Dr. Jillian Kinzie, Associate Director, Center for Postsecondary Research & NSSE Institute
Maximizing the Concept of Storytelling in Assessment and Institutional Effectiveness Narratives
Triple Crown
Communicating assessment reports are important steps in closing the loop on assessment activities. Often, important assessment conclusions are communicated through ineffective narrative and format that are detrimental to a culture of assessment on our campuses. In most assessment presentations, the audiences are not immersed in the narratives because of disconnect between the content, setting and character of the audience. This session examines the concept of storytelling, its application to assessment narratives, and the opportunities of using creating assessment stories on our campuses.

Nicole Lewis, University of Hawai‘i
Taiwo Ande, University of Mary Washington

Strand 4, Intermediate

A Framework for a Next-Generation Oral Communication Assessment in Higher Education
Blackberry Lilly
Oral communication has been identified as an important skill for college graduates by higher education institutions (AAC&U, 2011) and the workforce (Hart Research Associates, 2015). This interactive session will discuss the process of developing a framework for a next-generation oral communication assessment. Key dimensions and challenges in assessing oral communication will be discussed. We will also explain how these key dimensions can be translated into an assessment with actionable data for institutions to support instructional improvement of students’ oral communication skills.

How to Assess Student Readiness in the Health Professions: The CHARM Method
Crimson Clover
All institutions desire to describe their students as ‘practice ready’. Authentic assessment with Objective Structured Clinical Examinations (OSCEs) measures student skills and knowledge in a real-life environment. A model, CHARM, represents the 5 areas critical to the role of a practicing health care professional (Collecting Information, Handing Over Information, Assessing, Recommending, and Monitoring). Checklist items can be assigned to one of these 5 categories to assess both student performance and curricular effectiveness while providing the basis for individualized student feedback.

Ashley Castleberry, University of Arkansas for Medical Sciences

Strand 1, Intermediate
Redesigning Annual University-Wide Alumni Survey

Lilly of the Valley
Alumni feedback is an important indicator of program quality and provides important data to multiple stakeholders. Often times numerous external stakeholders dictate survey specifics. The Office of Assessment Services (OAS) at Northern Illinois University (NIU) will present an overview of their experience leading a university-wide effort to redesign an alumni survey after one regulatory agency lifted requirements on specific alumni survey questions. Participants will learn how OAS headed redesign efforts and included campus-wide input and community feedback.

Chris Parker, Northern Illinois University
Laura Lyles, Northern Illinois University

Strand 4, Intermediate

Rubric Development for Interdisciplinary Curricula

Bluegrass Room I
James Madison University’s Institute for Visual Studies (IVS) develops and delivers multidisciplinary, team-taught courses that focus on the production of visual content. In this session, I will give attendees an overview of a rubric that I am developing to assess the products students generate, regardless of the discipline. I will discuss the nature of the courses, the learning goals and objectives for IVS, the rubric itself, and ask participants to apply the rubric to samples of student work.

Daniel Robinson, James Madison University

Strand 1
Policies for Sustainable Assessment: Roles, Responsibilities, and Rewards

What policies support sustainable assessment at your university? At our decentralized, research-intensive university, we found the university and some colleges lacked clear policies and expectations, resulting in informal or ad hoc assessment practices. This poster session will share strategies and tools that our central office used to gather data about departmental assessment systems and then work with stakeholders to develop policies that clarify assessment roles and responsibilities, identify communication pathways, and recognize assessment in workload and annual review.

Kimberly Green, Washington State University
Elizabeth Carney, Washington State University

Strand 4

Citizen-Level Science Literacy: A Framework for Assessing and Improving Student Learning

Science literacy can be challenging to assess at the institutional level. This poster describes a straight-forward approach for assessing science literacy and using results to inform meaningful change. To ensure that graduates leave with adequate preparation in science for decision-making and civic affairs, our large public university uses Science Literacy Concept Inventory (SLCI) to assess basic science literacy. As part of an associated interest group, faculty discuss SLCI results and devise ways to target specific scientific misconceptions in the classroom.

Briana Keafer Morrison, Washington State University

Strand 1

Assessment of Community Engagement Learning Experiences: Connecting Courses to Community

Community engagement practices in college-level courses and programs serve as valuable tools for student learning as well as meeting the needs of local communities. Through application of theory to practice and development of professional skills, these learning experiences can help students apply important course content and strengthen their capacity to engage in and navigate challenges as members of communities. This poster session will examine the results of approaches to assessing community engagement in courses and programs.

A Model for Impacting Teacher Effectiveness
Bluegrass Room II

Higher education institutions strive for continuous improvement. For many instructors, the Teacher Course Evaluation (TCE) is the primary catalyst for assessing teacher effectiveness in the classroom. This data is used for merit review, promotion, tenure for tenure-track faculty, and decisions that need to be made for rehiring lecturers. While the TCE data is important to administration, how can instructors truly assess their teaching and take action to improve student learning? What are some other methods instructors can add to their teaching portfolio to help in decision making processes? Representatives from the University of Kentucky will offer specific and unique methods of assessment faculty can utilize to aid in continuous improvement of their teaching. This presentation will share a model for impacting teacher effectiveness using multiple data sources.

Emergent Assessment: Assessing Learning That We Don’t Expect
Ballroom A

Traditionally, assessment has asked faculty to develop a set of expected learning outcomes and then to measure those to determine what students know and don’t know. Faculty often are frustrated by this because they feel limited in what they are looking for in student learning. “Emergent Assessment” adds a dimension to traditional assessment processes by setting up a process where faculty can determine what students learn that is above and beyond the “traditionally set” learning outcomes. This session will explore this new area of emergent assessment, discuss how it can be used, how to help facilitate the process with faculty.

NETWORKING DINNER
(Open to Everyone)

We invite you to join us for a evening of assessment talk and comradery. The group will meet in the Hilton Lexington/Downtown lobby at 6 PM. From there, they will take a short walk to dinner at the restaurant(s) of everyone’s choice. The cost of dinner is the responsibility of the attendee. To ensure seating, please sign up in advance at the registration table by 3 PM on Tuesday afternoon.
Wednesday, June 3, 2015

7:00—8:00 AM

BREAKFAST
Pre-function area

Please join us for breakfast in the Pre-function area outside of Ballroom A.

7:00—7:45 AM

2016 Conference Planning Conversation
Triple Crown Room

Please bring your breakfast and join Leah Simpson in a conversation about next year’s AALHE conference. We want to hear your ideas on how to make the next year even better!

8:00—8:30 AM

BUSINESS CARD EXCHANGE

Please join attendees in the sponsor hall area for networking. The session will begin immediately following the business meeting.

8:30—9:30 AM

Performance Assessment in Academic Libraries through Campus Collaboration
Triple Crown Room

Librarians and classroom faculty share the common goal of developing students’ research abilities. This session will describe a collaborative approach to performance assessment of information literacy learning outcomes, one of our general education competencies. Through collaboration with faculty, we create an assessment that aligns course requirements with information literacy learning outcomes, and that can be applied across disciplines, departments, teaching formats, and class sizes. We will model the assessment process, and participants will use our rubric to score sample responses.

Easy Predictors
Blackberry Lilly

Leadership and problem-solving styles of individuals play a large role in facilitating progress, or the lack. Many institutions have moved beyond "where's my data?" to "okay, now what does it mean?" This session provides live demonstrations of how to do this, using a free cloud-based service that streamlines the workflow in finding predictors in small or large data sets. We will first explore the characteristics of Titanic survivors and build a predictive model, and then move on to educational data, to predict grades, retention, etc. You can try this at home.

David Eubanks, Eckerd College

Creating Research Questions and an Evidence Inventory to Guide Curriculum Review
Crimson Clover

A challenge associated with curricular review is identifying possible sources of evidence to support a meaningful assessment of the curriculum. This workshop will demonstrate how fundamental questions posed as part of the review process can be aligned with specific sources of evidence. For example, this session will present ways to research questions such as: Are course learning outcomes, teaching strategies and assessments in alignment? The presenters will share an evidence inventory used to guide the curriculum review process at two institutions.

Jane Souza, St. John Fischer College
Richard O’Brocta, South University

Learner-Centered Assessment: Opening New Channels for Student Voice
Bluegrass Room I

As higher education shifts from an instructional to a learning paradigm, how can students be given greater voice in the assessment process? What instruments and practices can be leveraged to open up new channels for learner engagement and feedback? This presentation provides evidence supporting the use of student self-evaluations, peer assessments, capstone experiences, and student end-of-course surveys to successfully measure student learning outcomes and dispositions and to provide high-quality data for continuous institutional improvement.

Shawntel Landry, American College of Education
Lana Sloan, American College of Education

Using Distributed Leadership to Advance Assessment: Leveraging Expertise, Position, and Influence
Bluegrass Room II

At any institution, assessment needs and challenges are pervasive, distinctive and multifaceted. We investigate a distributed leadership model where multiple people are responsible for and engaged in assessment work. This model has advantages and disadvantages in working towards furthering an assessment culture. Distributed leadership provides opportunities for shared high expectations and for differentiated support in meeting those expectations. Participants identify potential leaders, the benefits of their different perspectives, expertise and sphere of influence and how collaboration and distributed leadership can advance meaningful assessment.

Do I Matter? Assessing Co-curricular Programs with the University Mattering Scale (UMUM-15)
Ballroom A

Students with a strong sense of mattering have higher self-esteem, higher academic self-efficacy, are more likely to seek help, and may be more likely to succeed in college. This session describes the longitudinal use of the newly-developed Unified Measure of University Mattering with new students in a large Division of Student Affairs. We will examine how mattering is related to participation in co-curricular programs, evidence for validation of the scale, and how other institutions might make use of the instrument.

Jeremy Penn, North Dakota State University

Forward-Looking Assessment: Using Finding to Innovate, Create and Design
Ballrooms A & B

Learning assessment has traditionally looked at findings through a historical lens, examining evidence against ‘best practices.’ While looking at the past successful ways of doing things is valuable work, what are the thoughtful approaches to use findings to look forward? In other words, how do we get faculty and student support leaders in a culture to innovate to better understand problems, generate new ideas, and evaluate creative solutions? In this session, we will explore some proven and emerging techniques to get your learning team into new territory and to help them learn and grow in their ability to generate ideas to improve learning in a powerful way. Specifically, we will walk you through some approaches for sparkling inspiration to discover new ways of looking at learning, moving your team to the next level, to a culture to routinely innovate. The output will be a collection of ideas to solve learning challenges that are most important to you. In this session, participants will: (1) Apply techniques to find innovative solutions to real learning problems; (2) Explore ways to create and foster a culture of innovation in learning; (3) Create ways to bring your ideas to improve learning to life.

Dr. Robert Pacheco, Dean of Institutional Effectiveness, MiraCosta College

11:00 AM—Noon

INTERACTIVE CONFERENCE FINALE
Ballrooms A & B

Join fellow attendees to summarize important conference take-aways and reflect on the AALHE 2015 conference via a 3-way interview activity. (Note: you can also use this activity on your campus during different parts of the assessment cycle, particularly during interpretation of results and creation of an improvement plan.)

Stay until the end to be eligible for a multiple prize giveaways including a FREE REGISTRATION TO THE 2016 AALHE CONFERENCE in Milwaukee, Wisconsin.

Data from ExamSoft isn’t presented like that from other assessment systems. With easily digestible, infographic-style reports delivered immediately after each exam, we draw attention to areas of opportunity in learning, exam construction, and more. Our clients use the data from these reports for student remediation, item and rubric revision, exam analysis and revision, curriculum development, accreditation, and more. And their results are awesome. See what you could do with ExamSoft’s robust reports today.
The HE|ghten™ Outcomes Assessment Suite

Customize to meet your unique needs and provide evidence of your general education student learning outcomes.

New from ETS! This suite of computer-based student learning outcomes assessments enables you to customize testing by choosing what skills match your institutional goals.

✔ Adaptable: mix and match assessments
✔ Actionable Data: use with your internal data for accreditation and measuring student learning
✔ Time-saving: easy to implement and can be administered in a standard class period

For more information, visit [www.ets.org/heighten](http://www.ets.org/heighten).
